

Siphon-trace heating - Frost Protection-Heating Cables for Retrofitting for use with all suction- and pressure side Siphons.

The AquaKlima Siphon-trace heating prevents the freezing of condensate traps and lines through the automatic control of the thermostat.

The most efficient solution against frost damage at the air handling unit.

Description: Siphon-trace heating

Permissible operating temperature -30°C to $+65^{\circ}\text{C}$, built-in thermostat turns on at $+6^{\circ}\text{C}$. and off at $+13^{\circ}\text{C}$.

heating cable lengths: 1,0 m, 2,0 m, 4,0 m und 8,0 m (16 W/m)

Connection lead length: 1,50 m, 230 V (Schuko)

- easy installation
- low power consumption
- suitable for all siphons and pipes
- Easily retrofitted to existing devices
- self-regulating thermostat
- Supplied as a complete kit (without Siphon)
- various heating cable lengths available

Standard versions:

- Siphon-trace heating 1,0 m for Sondersiphon suction side - Item-No.: AQ-SBH-01
- Siphon-trace heating 2,0 m for Sondersiphon pressure side - Item-No.: AQ-SBH-02

Special versions:

- Siphon-trace heating 4,0 m - Item-No.: AQ-SBH-04
- Siphon-trace heating 8,0 m - Item-No.: AQ-SBH-08
